

KAISIE WU

+852 51654469 | wx786873449@gmail.com | u36635693@connect.hku.hk | NOL Holder

Product-oriented candidate with experience in AI feature design, workflow planning, user research, and data-informed product development. Strong at turning complex problems into clear product logic and practical digital solutions through scenario analysis and cross-functional collaboration.

Education

The University of Hong Kong

09/2025 - 06/2026

Master of Digital Urban Management GPA: 3.72/4.3

Relevant Courses: Programming and Foundations in Urban Analysis, Digital Technologies and Smart Cities, Spatial Mobilities Analytics, Urban Sustainability & ESG, Spatial Planning Analytics

South China University of Technology

09/2020 - 06/2025

Bachelor of Engineering in Urban and Rural Planning GPA: 3.66/4

Work Experience

AI Product and Operation Intern | Boolv Technology Co., Ltd. - Shenzhen, China

12/2025 - 02/2026

- Quickly ramped up on the AI video tool landscape and contributed to product work across landing-page design, feature planning, and user-experience optimization.
- Designed and optimized an SEO-oriented landing page for an AI image-to-video product, and collaborated with marketing and engineering teams to support implementation and launch.
- Wrote the PRD for the Message Notification feature and produced product analysis documents to identify UX issues and optimization opportunities across existing user flows.

Media Operations Intern | Tecdo 2.0 Technology - Guangzhou, China

06/2025 - 08/2025

- Monitored real-time advertising performance and handled daily operational anomalies in a live delivery environment.
- Worked with Testing/QA and technical teams on bug reporting, functional verification, and post-update issue follow-up.

Selected Product & Platform Projects

TraceWall-HK | Product Prototype & Platform Build

04/2026

- Translated the TraceWall-HK concept into an interactive web prototype within a rapid project sprint, turning a course project on traceable material passports into a product-style platform demo.
- Defined the core content structure and user-facing modules, and iterated the interface and flow through Figma-based design refinement.
- Built and refined the prototype using Google AI Studio, Cursor, and VS Code, including routing setup to improve navigation and usability.

Research & Competition Projects

Green Hunter | EV Charger Siting Project

11/2023-03/2024

The Challenge Cup Chinese Collegiate Entrepreneurship Plan Competition

- Defined a data-driven siting approach for public EV chargers by selecting key evaluation indicators and shaping the project's machine-learning-based technical path.
- Built a model-based technical framework for charger siting in Guangzhou, including spatial data preparation, indicator screening, and map-based evaluation outputs for decision support.
- Framed the product opportunity through market environment analysis, pain-point mapping, and an early competitor canvas, and contributed to the business plan.

Senior Canteen | User Research & Service Study

03/2024-07/2024

WUPENiCity in Urban Sustainability Reports

- Conducted field observation and semi-structured interviews with elderly diners and canteen operators to understand real dining patterns, user concerns, and operational challenges in senior canteens.
- Used NVivo-based qualitative analysis to translate interview data into insights on service improvement, space use, and intergenerational dining.
- Developed recommendations for shared dining, space improvement, and sustainable canteen operations.

Publication

Fresh retail layout and forecast based on multi-source big data and machine learning

ICCREM, 2024

Skills

- **Product & Strategy** (product definition and workflow planning): User Research, PRD Writing, Workflow Design, Product Analysis
- **Research & Analysis** (data analysis and research support): Python, SQL, GIS, SPSS, NVivo
- **Prototyping & AI Tools** (prototyping and AI-assisted execution): Figma, ChatGPT, Gemini, DeepSeek, Cursor
- **Languages**: Mandarin Chinese, English (working proficiency), Cantonese, Japanese (N2)
